We protect what we *Love*

With courage, conviction, and a good soul, we aim to achieve greatness. We create respect for Australian manufacturing, our products, our team, and our customers. When you choose the Sussex brand, you are not just buying for today but also for our future.

We are united in our determination to produce Australian-made products adhering to the highest ethical principles. You have our promise.

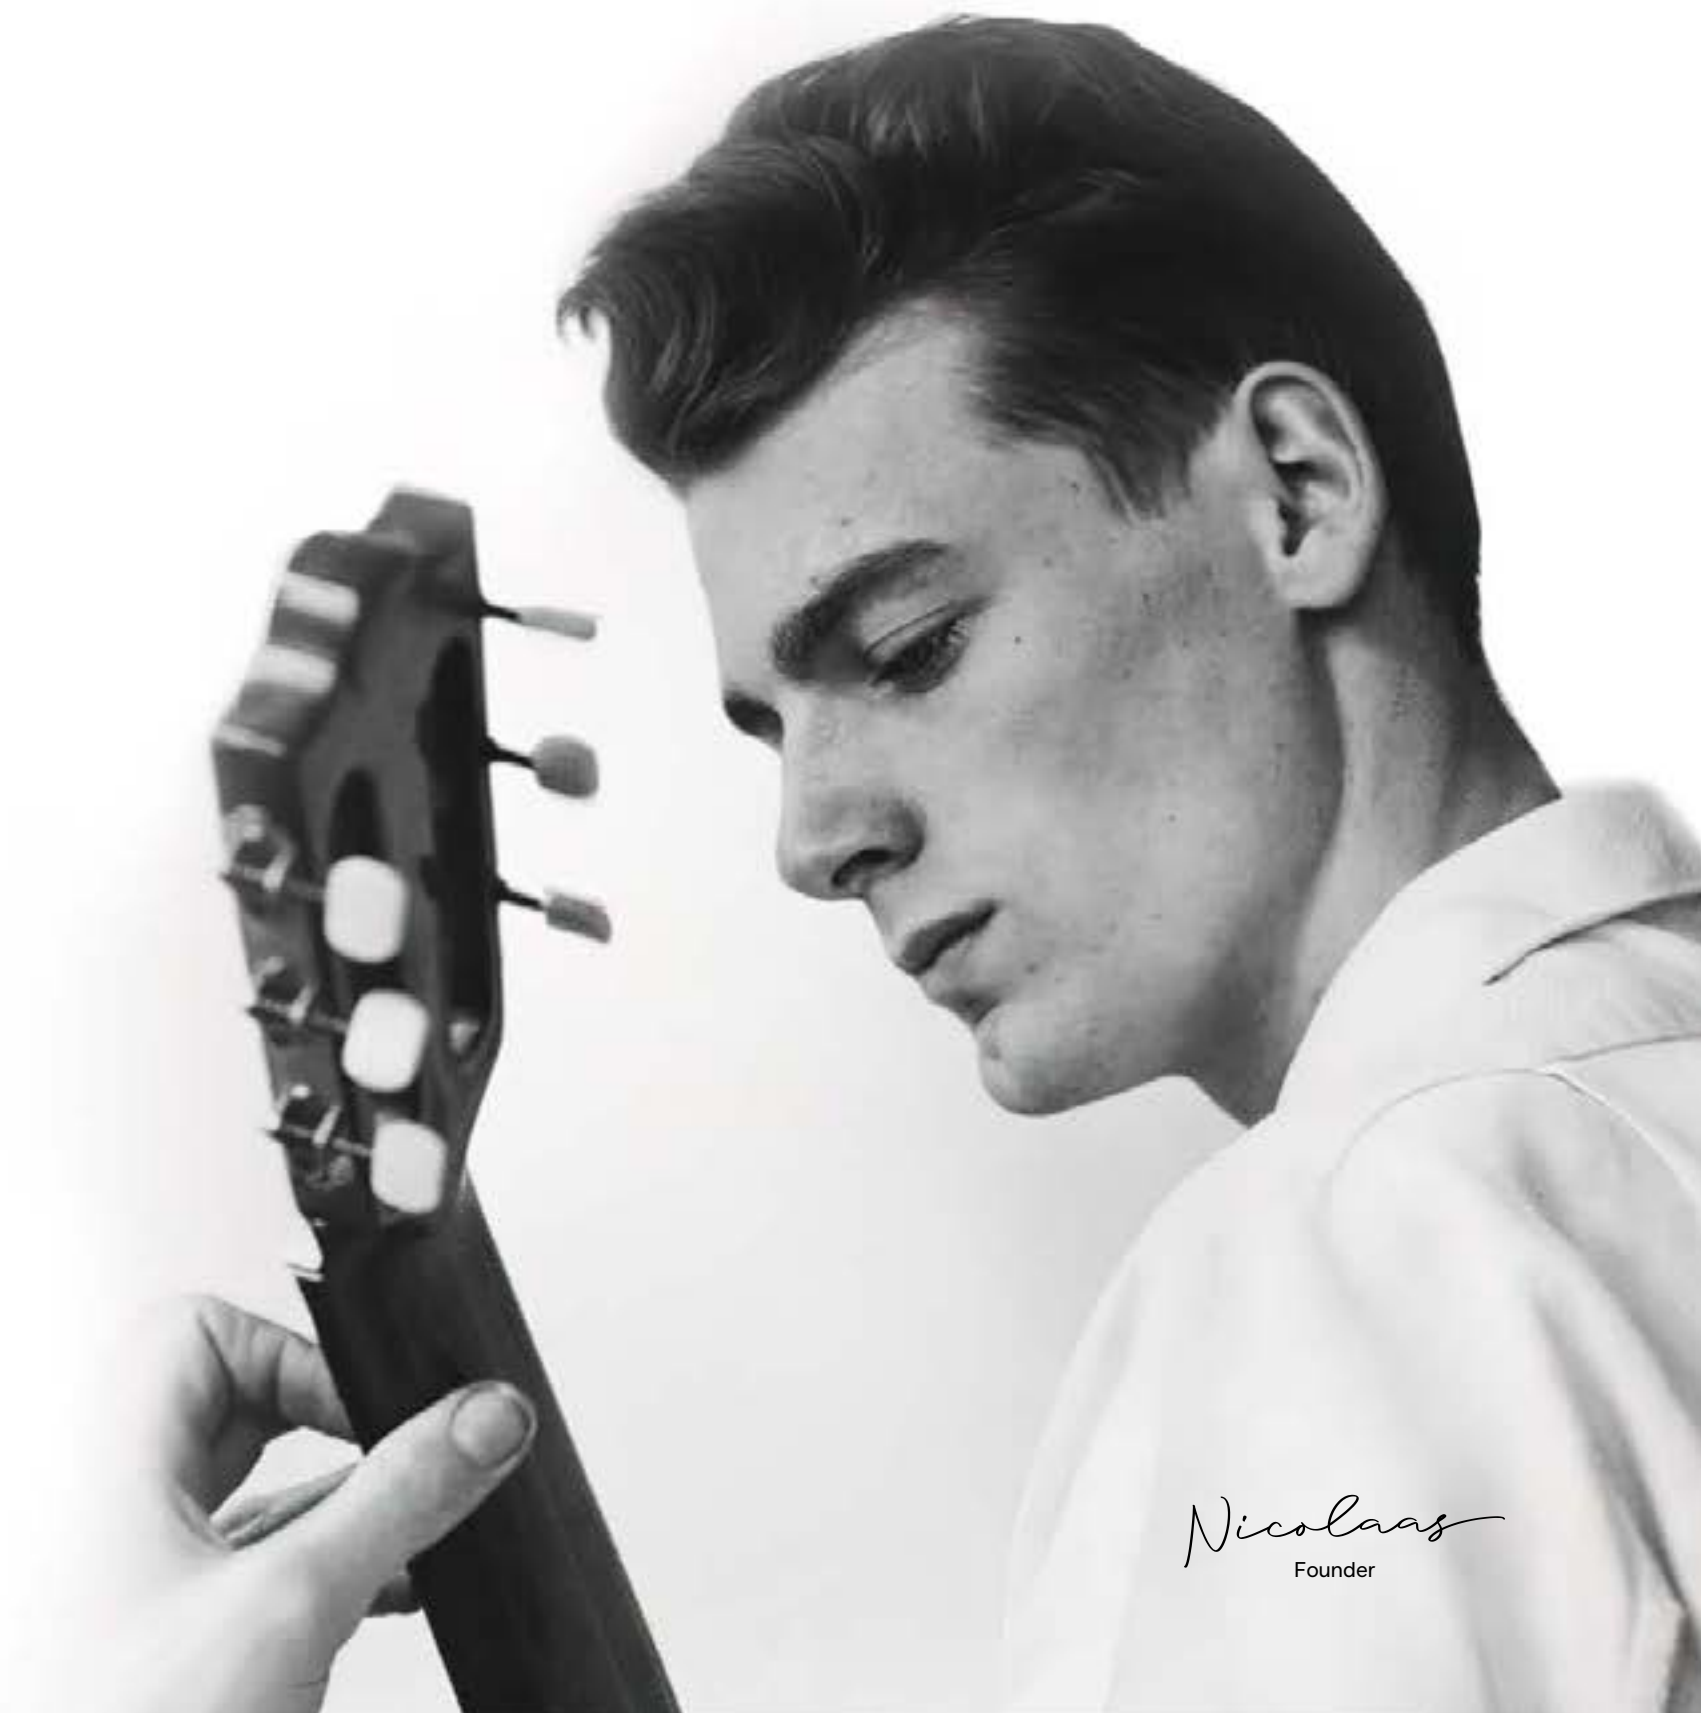

*Vanessa
& George*

Vanessa & George Katsanevakis
DIRECTORS

From father to daughter,
the story
Continues

The Sussex story is a family adventure to build an Australian business with sustainability at its heart. In 1960, our founder, Nicolaas Johannes van Putten, arrived in Australia with an idea and a talent for craftsmanship in watchmaking. When he took the next step in his career, he extended his obsession for craftsmanship into tapware. His vision was to make the best quality product — the sturdiest, most solid, and enduring tapware available — so that every piece in the collection would be made to last.

Now, more than 25 years after our first products were created, Nick's design engineering excellence still underpins every part of our process and is carried on today by his family as they continue to make timeless tapware crafted with soul.

Nicolaas
Founder

Heritage

Australian From Start to Finish: A Path to *Perfection*

There are five key stages in the creation of a Sussex product. Countless steps are involved within each stage to guarantee the quality of each product until it's ready to become yours.

3 / Metal Finishing

Brilliance, shine, and colour are chosen and permanently set with thorough care and control using our metal polishing, electroplating, painting, and PVD processes.

1 / Design

Our in-house design team plays a crucial role in harmonising form and function in our products. They work closely with our engineers, production experts, and craftspeople.

4 / Assembly

No matter the level of complexity, our team maintains methodical practices to ensure the best quality and workmanship is delivered to every product.

2 / Manufacturing

To keep it all in-house we have three warehouses covering 6000 sq. meters to produce more than 500,000 components each year, entirely in Australia.

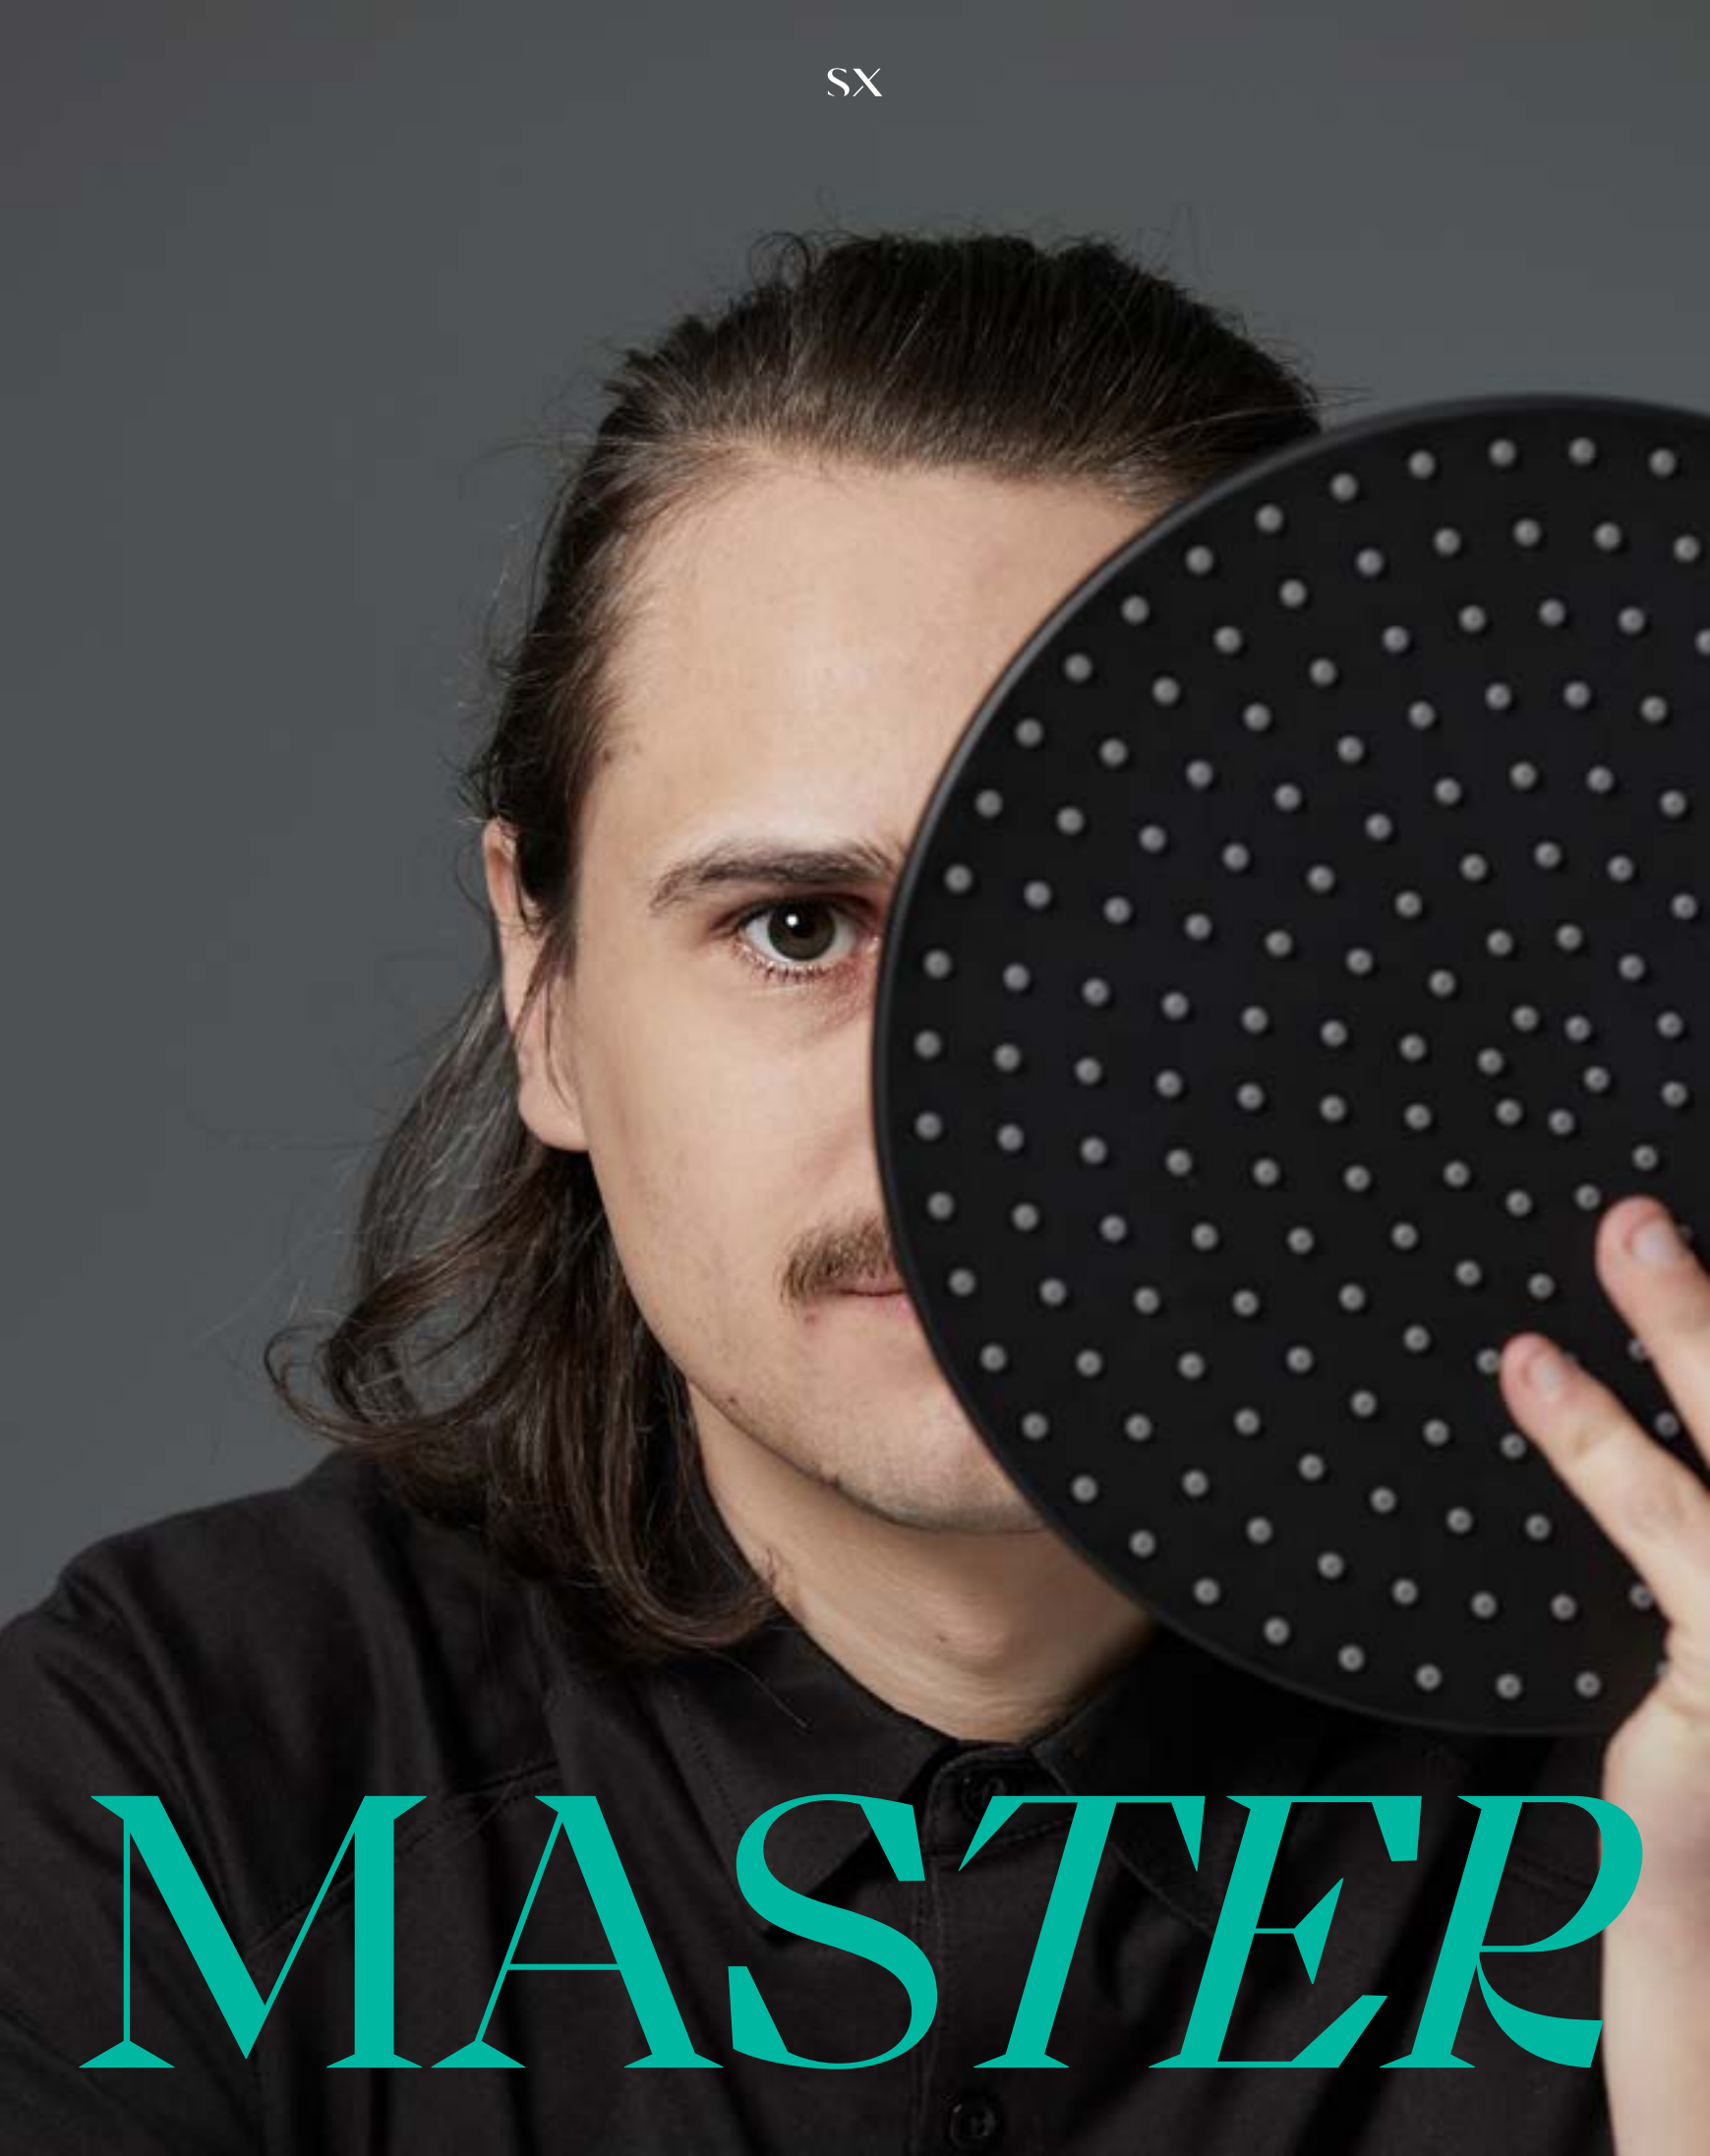

5 / Logistics

Dynamic teamwork needs to manage many moving parts for secure, accurate, and timely deliveries to our customers.

Perfect function and beautiful form have always been part of the Sussex *design* DNA

With sketches guided by vision that embrace the Sussex design philosophy, our designers take the first step on a long journey to turn those lines into a workable concept. They collaborate hand in hand with our engineering and architectural managers to create high-end collections for Australian homes. Every detail has been thoughtfully considered and obsessed over again and again.

SX

A decades-long journey
to master the art of
manufacturing.

Sussex has the coveted position of being vertically integrated entirely in Australia. Every product is created in-house: beginning with the vision of a collection to the casting in the foundry, all the way to the craftsman's workbench. The journey is completed using our LUXPVD® world-class finishing technology.

MASTER

THE ART

VISION

Make the best product and leave an Australian-made legacy which creates a sustainable future for our next generation.

MISSION

We pursue excellence at every level by embodying true craftsmanship, progressive technology, and best practice sustainability.

Taking *responsibility*
is part of our *DNA*.

30%

Reduction in

100%

Efficient energy lighting installed
throughout

Making *it* ZERO

Australia's first carbon neutral
tapware manufacturer.

Our ambitious goal of transforming our manufacturing operation and all our products to reach net zero emissions hasn't been easy, but it was necessary. We are now officially a member of the Climate Active network, one of the strictest carbon neutral certification bodies in the world. This is because we're committed to making things right. Which means putting our future first by using sustainable technologies, sourcing raw metals, and designing and manufacturing our products entirely in Australia.

As a Climate Active member, we have achieved our products and organisation certification through Australia's most rigorous process and testing. Our customers can be sure they genuinely buy carbon-neutral products and contribute to positive climate action.

SX

LUXPVD®

Perfect finishes
every single time.

LUXURIOUS experience

Produced entirely in Australia, LUXPVD® technology gives us complete control of the finishing process, guaranteeing perfect colour and perfect tone every time.

UNIQUE finishes

All our LUXPVD® finishes are carefully curated, with flawlessly lustrous colour and unmatched tone for a consistent finish that is more sustainable and luxurious to the touch.

XTREME durability

LUXPVD® finishes are made for real living. It does not tarnish, corrode, or scratch easily, which is why we are proud to offer a 10-year extended warranty.

Our state-of-the-art
LUXPVD® facility.

From a technique pioneered for aerospace, Sussex has created LUXPVD®. A contamination-free process that is kind to the environment. Where metal vapour and vacuum combine to perfectly coat each and every tapware piece, every time, creating beautiful finishes that will stand the test of generations.

SX

Luxury

35

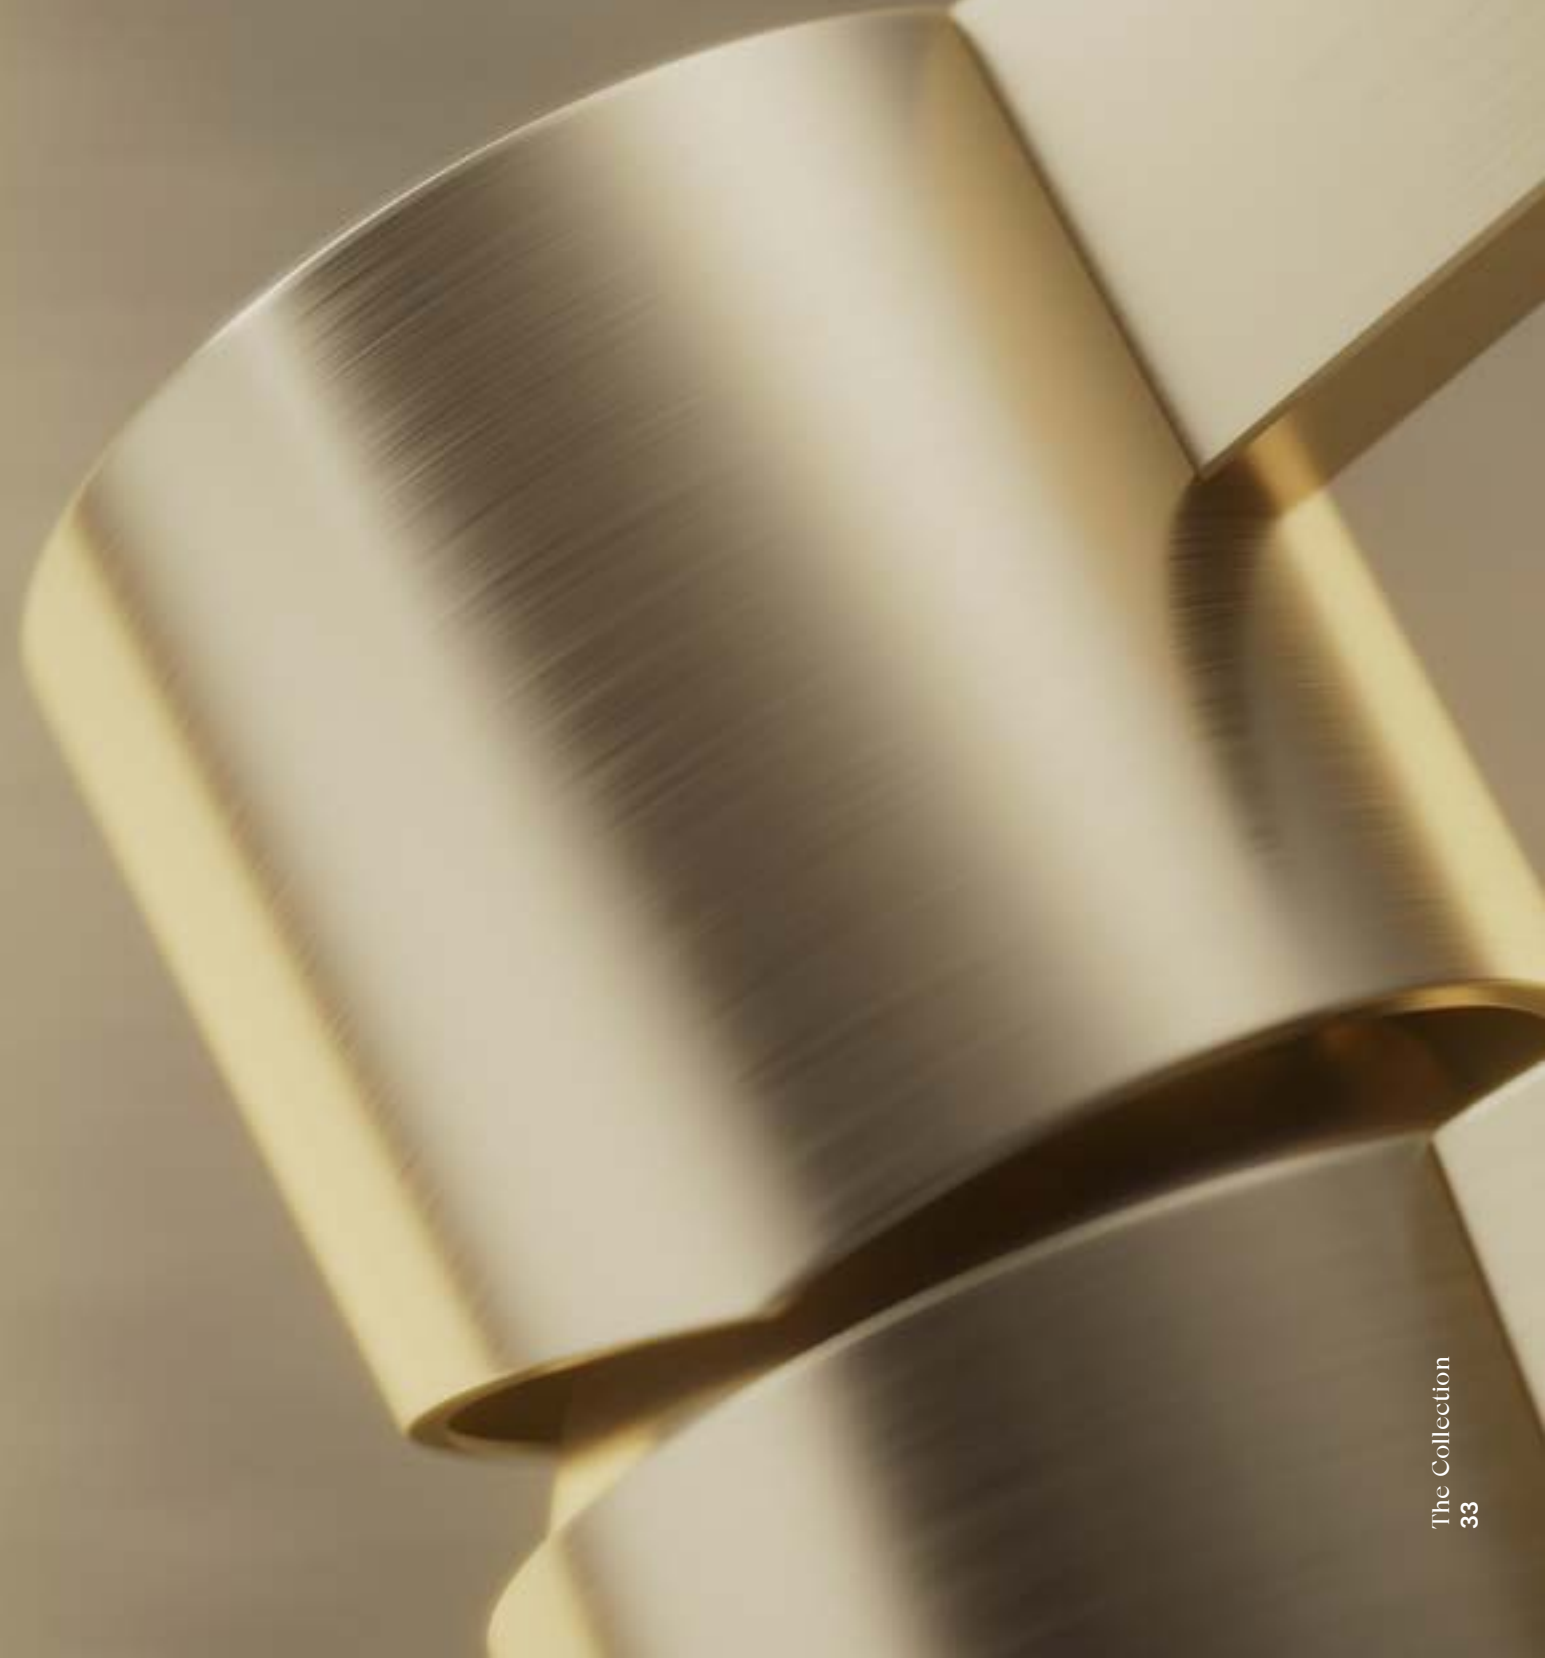

Finishes

Colour is intensely personal. That's why Sussex offers an extensive range of finishes to give your product the perfect finishing touch. Each is curated to complement our products' timeless designs. Infuse your personality in finishes from living brass, an organic brass that beautifully patinas with time; any of our timeless neutrals, offering warmth and elegance to every space; or one of our vibrant, sophisticated LUXPVD® finishes.

Once you explore our vast suite, you'll see why Sussex is synonymous with finishes in the Australian market.

Designer

LUXPVD®

From a technique pioneered for aerospace, Sussex has created LUXPVD®, a contamination-free process that is kind to the environment.

Where metal vapour and a vacuum combine to perfectly coat each and every tapware piece, every time, creating beautiful finishes that will stand the test of generations.

LUXPVD® finishes are robust, durable and hard-wearing that are suitable for all indoor applications.

Electroplated

Sussex electroplated finishes are robust, durable, and hard-wearing suitable for all indoor applications an everlasting finish that is corrosion-resistant and easy to clean.

Living

Sussex living finishes are raw (unsealed) metal surfaces that are designed to tarnish and patina in an inconsistent manner over time.

Time influences how this finish appears, and it can often darken to a rustic appearance.

Paint

Sussex painted finishes are similar to automotive paints that are designed to be wearable, durable and easy to clean.

When treated well and with regular maintenance, painted finishes can last for many years.

Stainless Steel

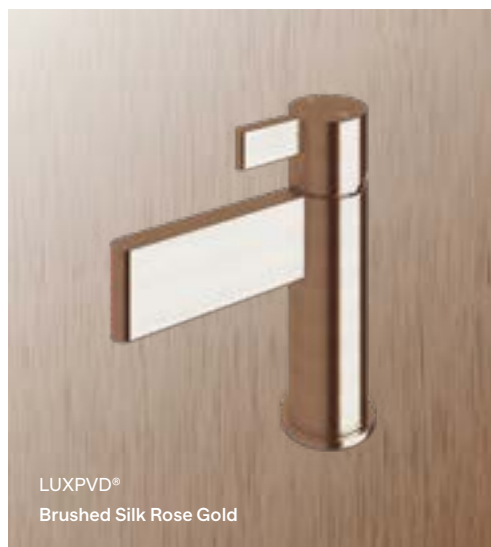

316 Marine-grade Stainless Steel is an unsealed, robust material designed for outdoor use, providing many years of usage in a wide range of environments.

As with any Stainless Steel products, exposure to hard water and/or coastal environments can cause “tea-staining” (surface discolouration).

Foundry

Even as new
technologies are
employed, the human
touch remains critical

Julian
Foundryman

Our internal foundry is a key component in guaranteeing both the excellence of our manufacturing process and our commitment to long-term sustainability.

From the reused scraps to the ability to ensure the highest levels of purity, our process is a totally closed loop in the hands of our specialised foundrymen. With this rigorous process, we've been able to recycle our brass and create ethical, high-quality products. This method is integral to how we manufacture. It keeps our traditions alive and ensures nothing goes to waste.

"It's a unique
experience to have
complete control
over quality."

Design

Each collection is a result of our desire to simplify, and the passion of our master designers and engineers

Ashleigh
Lead Industrial Designer

Our designers are always mindful of current tastes, but with one eye turned towards the future, they remain true to Sussex's heritage. This alchemy of the past, present, and future uniquely distinguishes the design of a Sussex tap.

Throughout the creative process, we look at design trends, usability studies, and market feedback to guide our designs. We then blend our passion for detail, decades of experience, ethical responsibility, and our unique spirit to create products that symbolise the essence of Sussex. This is the foundation of a product that is developed with both head and heart.

"It's about understanding people's needs and taking them on a journey."

Values

The Sussex Way –
Living by Our Values
Every Day

The Sussex Values are what we stand for and how we act towards one another. It's at the very core of who we are, defining our collective beliefs and guiding our individual actions. We can foster an environment that is respectful, inclusive, and diverse, where everyone is considered equal.

We recognise the power of individuals connected by values. Nothing at Sussex would be possible without the many remarkable people who continue to contribute their talents at every level.

"My main aim is
to make the
customer happy."

Technology

Duct
Form & Time

We pursue excellence
by using technology
to strengthen our
traditional skills

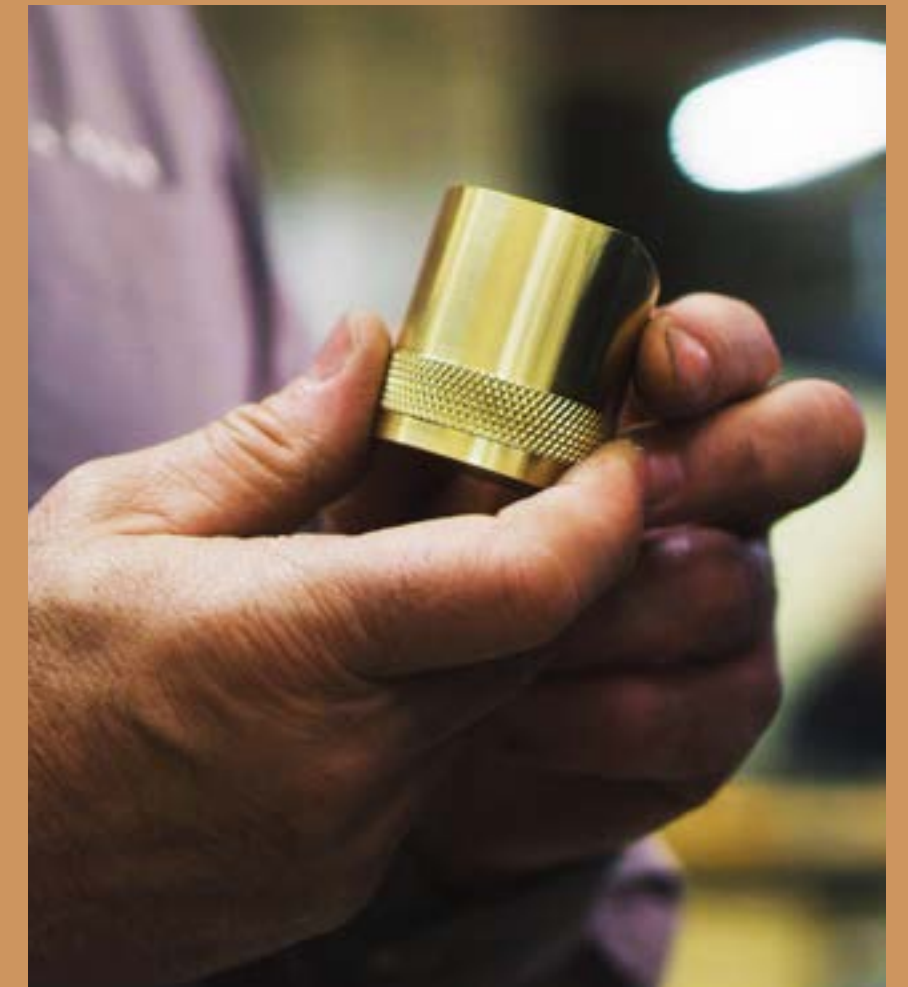

Zoran
Product Development Manager

The art of manufacturing is a long-term journey. For us, this means finding the balance between traditional techniques and the latest technology, as well as the determination to compete on the world stage while remaining entirely in Australia. That's why it's necessary to invest in modern technologies for our manufacturing. This standard is managed by well-trained and talented operators using the most modern and eco-friendly machines.

We are one of the very few companies in Australia to implement robotics to achieve high standards of polishing and to build an architecturally designed, state-of-the-art facility to house the world's best PVD finishing technology.

We're moving towards a fully automated process that ensures the precision and quality in the finishing of our products is perfect every time.

"That's the beauty of
our business: we can
make changes very
quickly."

Craftmanship

Monsoon
Inspired by Nature

The Spirit of Sussex
runs through our
craftspeople

Our story of craftsmanship began over 60 years ago when our founder travelled from the Netherlands to start a business in Australia based on his talents for watchmaking. When he established Sussex in 1998, his intrinsic passion in traditional craftsmanship easily translated into tap making. That foundation of care and precision has been carried into the next generation, who continues his legacy of making timeless tapware crafted with soul.

"You have to
be very inventive,
keep thinking of
new ideas."

SX

Introducing

Suba

Modernist form
that's a work of art
in any space
bold

SX

Minimalist

Artistry

Created from the
exploration of boundaries
between minimalist
sculpture and practical
objects

The Suba collection is perfect for Australian modern living designs that require a sculptural touch. Designed to elevate your daily experience, these pieces will be statements for years to come.

SX

Subtly

MODERN

The simplicity design
reveals the dynamic
attention to detail and
genuine craftsmanship
needed to create a
functioning, beautiful
work of art

SX

Visually

Crafted

Flat edges traverse
into subtle curves, a
confident geometric
statement that warms
to its space

Journey

When an architect, interior designer, builder, or developer comes to us with their plans for an upcoming project, our Sussex manufacturing team knows that it's extremely important to understand all the details right from the start. We create strong relationships with our clients so we can be there at every stage, making your ideas reality.

"You need to do every step with excellence."

SX

Introducing

Voda

Modernist style with a
minimalist touch

sophistication

SX

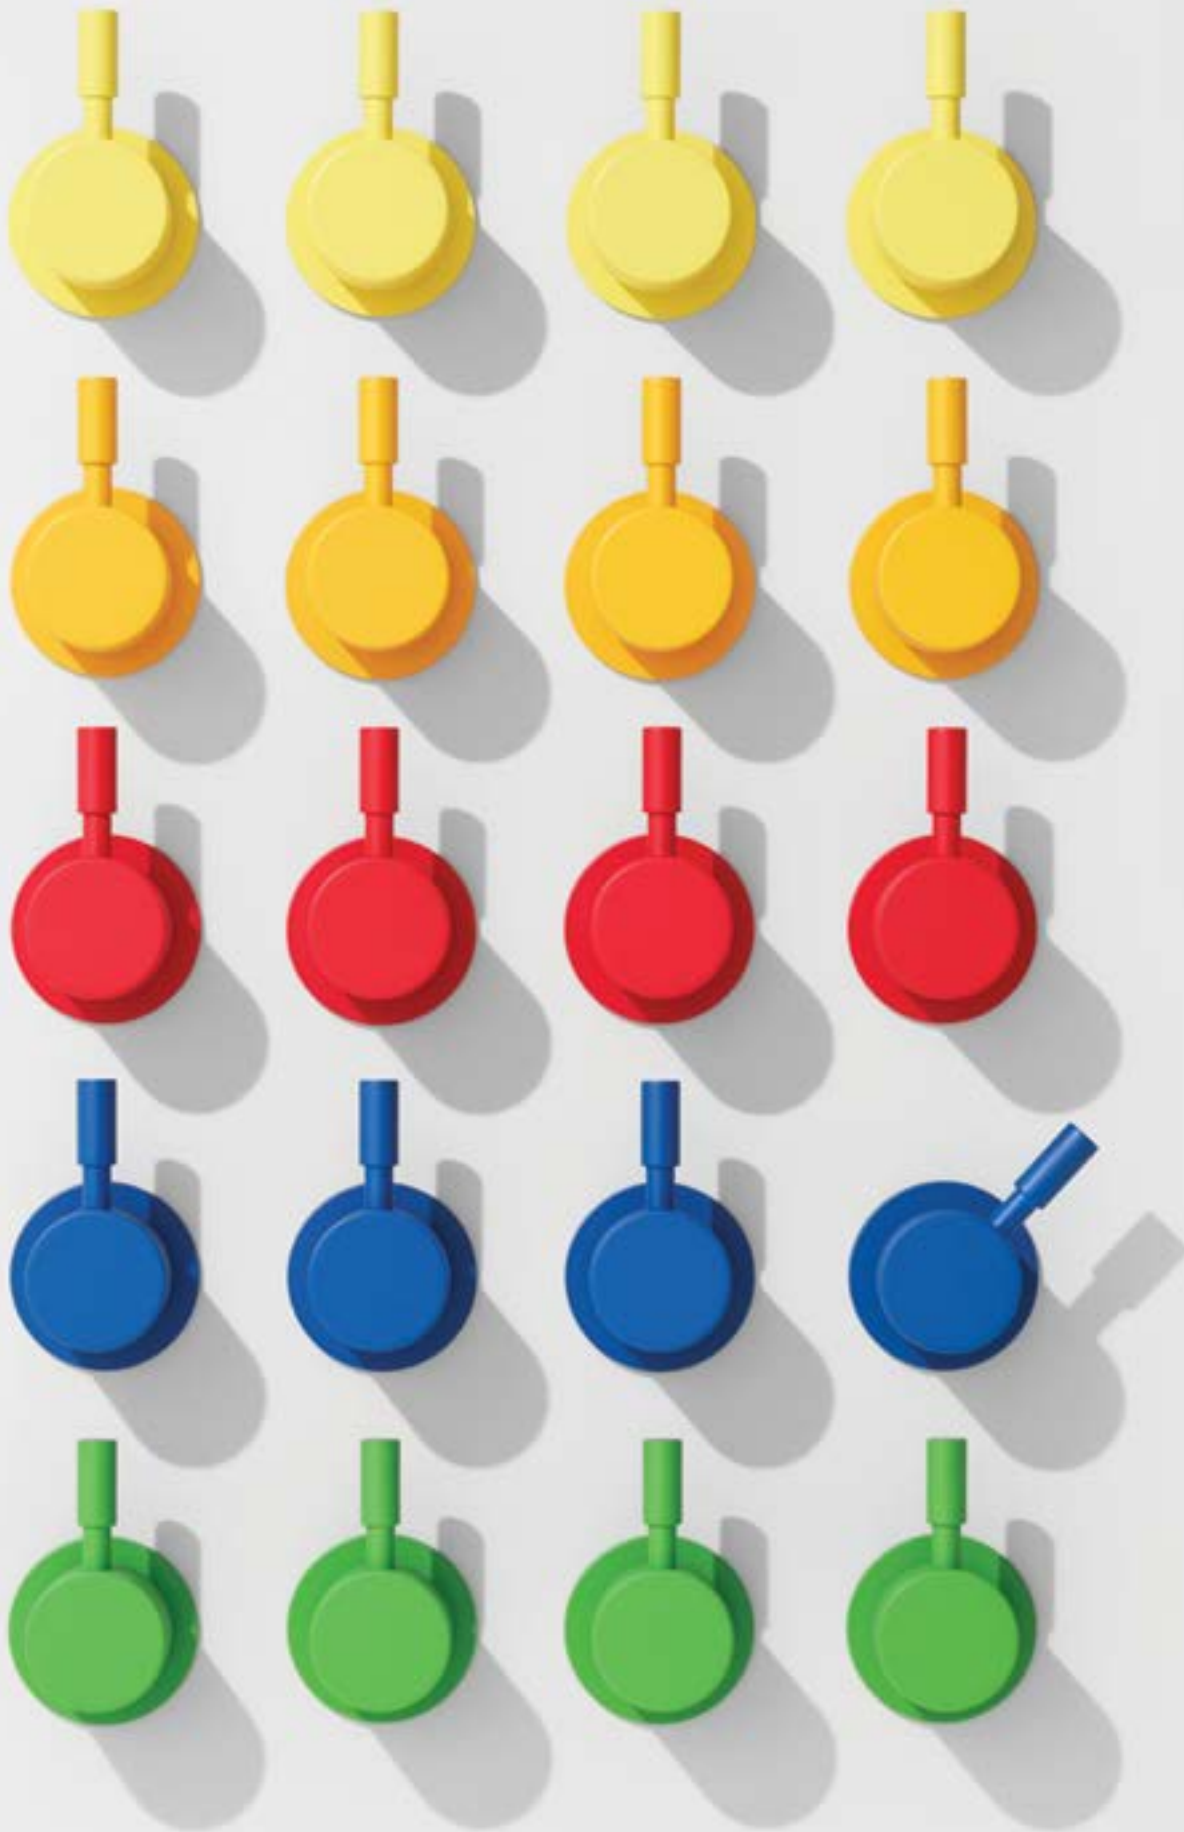

Modern

Refinement

The classic geometry and
clean finishes weave together
industrial modern style with
simple and purposeful design

The idea of “form follows function,” a principle
associated with the modernist design movement,
was the starting place for our Voda collection.

Modern

DESIGN

Voda celebrates pure
aesthetic through its
eye-pleasing geometric
lines and the visual
harmony of its shapes

SX

Voda

People

Our greatest treasure
are our incredible
people

What connects us all is our deep sense of passion and pride in our accomplishments. Some of our team has been with us for over 20 years, while others are new talents, but both are driving Sussex forward into a better future.

Our product knowledge, excellent communication skills, and superb attention to detail are a driving force behind the creation of innovative solutions to various problems whether it's related to design, space, or a custom need.

"We sell more than
just the product; it's
about being adaptive
to our clients' needs."
